Kishan Kishore Sobhee

Full Stack Developer · Laravel & React

Vacoas, Mauritius (GMT+4) | kibee0506@gmail.com | +230 5905 4115
linkedin.com/in/ksobhee | kishan-1000101.github.io/portfolio

SUMMARY

Full-stack developer with 3+ years of experience delivering production systems in Laravel and React, from multi-tenant SaaS to marketplaces and booking platforms. Sole developer of KeyCars, a car rental SaaS with 50+ domain models, and project manager and co-developer of ZilMall, a Mauritius multi-vendor marketplace. Ships production AI features (OCR, automation, chatbots) and uses AI-assisted development (Cursor) with code review of every change, automated tests, manual testing and staging before release. Earlier enterprise experience in Salesforce (Apex, SOQL), Oracle PL/SQL and .NET. Manages several client projects concurrently for clients across Europe, the Indian Ocean and Australasia. Open to full-time or contract roles, remote or hybrid.

SKILLS

Core: PHP, Laravel, JavaScript, TypeScript, React, Inertia, Filament, Blade, MySQL, Tailwind, REST APIs, Git

Also: Node.js, Python, Supabase/PostgreSQL, WordPress, n8n, OCR and PDF automation, Docker, Nginx, Jenkins, Linux/OVH, Jira

Enterprise and other: .NET / C#, Salesforce (Apex, SOQL, Flows, Omnistudio), Oracle PL/SQL, Angular, Drupal, MongoDB, Flutter

Languages: English, French, Creole (fluent)

EXPERIENCE

Freelance Full Stack Developer | 2025 – Present

Independent practice serving several clients concurrently, managed through clear scheduling and prioritisation. ISCL ran on fixed weekly hours; other engagements were deadline-based. Gather requirements directly with each client and own delivery from scope to production.

Agence ISCL (Réunion), client | Jun 2025 – Present

Freelance engagement: about 20 hrs/week (evenings and weekends) from Jun 2025, about 40 hrs/week (weekdays) from Oct 2025 to Sep 2026, then ongoing on a contract basis for upcoming product work.

- Built KeyCars (keycars.fr) as sole developer: a multi-tenant car rental SaaS in Laravel 12, React, TypeScript and MySQL, with 50+ domain models, company-scoped tenancy, and admin, manager and field-agent roles.
- Built a pricing engine that selects the daily rate from plans, duration tiers, packages and seasonal rates, replacing manual quote calculation.
- Automated quotes, contracts and invoices as PDFs, added camera OCR for customer records, and built vehicle inspections with damage diagrams, photos and dual signatures, so staff complete a rental in one flow instead of on paper.
- Built tracking-dashboard.fr: white-label, multi-tenant marketing dashboards (React, TypeScript, Supabase) fed by scheduled n8n workflows, replacing manually built client reports. Also delivered custom WordPress plugins and QA on rentflo.fr.

ZilMall (Mauritius), client | Oct 2025 – Present · zilmall.mu

- Project manager and co-developer of a multi-vendor marketplace in Laravel 12, React 19 and Inertia, with storefront, seller portal and admin in one codebase.
- Co-develop with a second developer, splitting features and reviewing each other's code, and run regular meetings with the client on scope and releases.
- Built seller onboarding for business and individual sellers, with documents, payouts and VAT details behind admin approval queues, plus wholesale pricing. Now in soft launch, onboarding the first sellers.

MR Production Co Ltd (remote), client | Feb 2026 – Present · mineshramchurn.com

- Sole developer of the studio website and booking platform (Laravel, Filament, Inertia, React), live on OVH.
- Replaced booking over chat with a live calendar handling blocked dates, multi-day and multi-location shoots, and budget options.
- Built a Filament admin so the studio manages bookings, crew, availability, portfolio and content without a developer.

Safyr Utilis (remote), client | Feb 2025 – Nov 2025 · syul.mu

- Designed, built and deployed the company website as sole developer, with a responsive layout the team edits itself after handover.

Agileum (Mauritius, hybrid) | Jan 2025 – Apr 2026

Associate Software Engineer (full-time)
Jan 2025 – Oct 2025

- Built and maintained client applications across Laravel, PHP, Node.js, Angular, Python and Drupal.
- Delivered an AI support chatbot for a client's customers, plus document automation.
- Set up deployments with Docker, Nginx and Jenkins, and supported a .NET Core migration.

Full Stack Web Developer (contract)
Oct 2025 – Apr 2026

- Continued client work after the full-time role: new features, integrations and production fixes.

Career break | Oct 2024 – Dec 2024

- Built and sold custom gaming PCs between roles.

Business Force Limited (Curepipe, hybrid) | Feb 2023 – Sep 2024

Information System Engineer (full-time), alongside my BSc studies

- Delivered Salesforce features with Apex, SOQL, Flows and Omnistudio.
- Provided production support as part of a team serving users in New Zealand, Australia and France, investigating data issues in Oracle PL/SQL.
- Mentored two interns through onboarding and code reviews, and worked on Laravel and REST API development.

EDUCATION

BSc (Hons) Software Engineering, Upper Second Class (2:1) · University of Technology, Mauritius 2021 – 2025

Seeds for the Future Program · Huawei 2023 – 2024

Selected for Huawei's ICT programme, with training in cloud, 5G and IoT. In the Tech4Good team project, our pitch for a greenhouse robot that scans plants for disease and sends the data to a mobile app placed second.

Higher School Certificate · Sir Abdool Raman Osman State College, Phoenix 2019 – 2021
