SUMMARY

Full-stack developer with 3+ years delivering production systems in Laravel and React, from multi-tenant SaaS to marketplaces and booking platforms. Works with AI-assisted development (Cursor) and has shipped production AI features (automation, OCR, chatbots). Sole developer on KeyCars, a car rental SaaS, and project manager on ZilMall, a Mauritius multi-vendor marketplace, owning scope, release priorities and stakeholder communication. Has delivered for local and international clients across Europe, the Indian Ocean and Australasia. Open to full-time or contract roles, remote or hybrid. Based in Mauritius (GMT+4).

SKILLS

Daily: PHP, Laravel, JavaScript, TypeScript, React, Inertia, Filament, Blade, MySQL, Tailwind, REST APIs, Git

Also: Node.js, Python, Supabase/PostgreSQL, WordPress, MUI, n8n, OCR/PDF automation, Docker, Nginx, Jenkins, OVH/Linux, Jira

Earlier: .NET / C# / ASP.NET, Salesforce (Apex, SOQL, Flows, Omnistudio), Oracle/PL/SQL, Angular/AngularJS, Drupal, MongoDB, Flutter/Android

Languages: English, French, Creole (fluent)

EXPERIENCE

Current contract clients: ZilMall, MR Production and Agence ISCL (Linar). Full-time and part-time roles follow.

ZilMall | Mauritius · Hybrid · zilmall.mu

Full Stack Developer & Project Manager

Contract · Oct 2025 - Present

- Project manager and co-developer, with one other developer, of a Mauritius multi-vendor marketplace in Laravel 12, React 19 and Inertia: storefront, seller portal and admin in one codebase.
- Built onboarding for business and individual sellers, with documents, payouts and VAT details behind admin approval queues, plus wholesale pricing.
- Own scope, release priorities and stakeholder updates. Now in soft launch, onboarding the first sellers.

MR Production Co Ltd | Remote · mineshramchurn.com

Full Stack Developer

Contract · Feb 2026 - Present

- Sole developer of the studio website and booking platform (Laravel, Filament, Inertia, React), live on OVH.
- Replaced booking over chat with a live calendar: blocked dates, multi-day and multi-location shoots, and budget options.
- Built a Filament admin so the studio runs bookings, crew, availability, portfolio and content itself.

Agence ISCL (Linar) | Réunion · Remote

Full Stack Developer

Contract · Sep 2026 - Present

- Continued with the agency on contract after the full-time role for upcoming product work.

Full Stack Developer

Full-time · Oct 2025 - Sep 2026

- Sole developer of KeyCars (keycars.fr), a multi-tenant car rental SaaS in Laravel 12, React, TypeScript and MySQL: 50+ domain models, company-scoped tenancy, and admin, manager and field agent roles.
- Built a pricing engine that picks the daily rate from plans, duration tiers, packages and seasonal rates.
- Automated quotes, contracts and invoices as PDFs, added camera OCR for customer records, and built vehicle inspections with damage diagrams, photos and dual signatures.
- QA on rentflo.fr, a related rental product.

Full Stack Developer

Part-time · Jun 2025 - Oct 2025

- Built tracking-dashboard.fr: white-label, multi-tenant marketing dashboards in React, TypeScript and Supabase, fed by scheduled n8n workflows, replacing manually built client reports.
- Built custom WordPress plugins for the agency.

Agileum | Mauritius · Hybrid

Full Stack Web Developer

Contract · Oct 2025 - Apr 2026

- Contract continuation of client work from the full-time role: new features, integrations and production fixes.

Associate Software Engineer

Full-time · Jan 2025 - Oct 2025

- Built and maintained client applications across Laravel, PHP, Node.js, Angular, Python and Drupal.
- Delivered an AI support chatbot for a client's customers, plus document automation.
- Set up deployments with Docker, Nginx and Jenkins, and supported a .NET Core migration.

Safyr Utilis | Remote · syul.mu

Web Developer

Contract · Feb 2025 - Nov 2025

- Designed, built and deployed the company website as sole developer, with a responsive layout the team edits itself after handover.

Business Force Limited | Curepipe · Hybrid

Information System Engineer

Full-time · Feb 2023 - Sep 2024

- Delivered Salesforce features with Apex, SOQL, Flows and Omnistudio.
- Provided production support for users in New Zealand, Australia and France, investigating data issues in Oracle PL/SQL.
- Worked on Laravel and REST API development, and mentored two interns.
